ion newstandrood serial number so what was the currency will use IE as much. they have completely different features. I know the layout is much easier to manage, don't know why they couldn't adapt the look of their forums. Now to the code which I still need to add. I'm not sure how to add the menu to the menu tab. What's really the difference between the two. The most important difference is that the old forum contained information on over 600 distinct serials, which are no longer listed on this forum. You'll have to look up the serial and find the PCB. There were two versions, the 1991 version had the original name Spooky and the later 1994 version was named the Tanooki Circuit. I assume that you're saying the later 1994 version was actually a modified version of the original. If that's the case, I wonder if anyone who has both versions has tried to compare them? I had a tanooki circuit, but it was all scratched up and sold to someone else. Quote: Originally Posted by kraggul The three pages are designed differently, so you can't easily convert one to the other. I'm not sure of how to add it, either. I'm not familiar with Dreamweaver. If it's a choice between no support at all and Dreamweaver, I'd rather have no support than Dreamweaver. The most important difference is that the old forum contained information on over 600 distinct serials, which are no longer listed on this forum. You'll have to look up the serial and find the PCB. That makes sense, I didn't know that. The modification was a different name and the artwork changed to include a portrait of the character. I wouldn't know anything about the differences in 82157476af
